Cal EOC Incident – 2014 Drought

- SOC / Inland REOC remains activated in support of 2014 Drought

ACTIVE WEATHER WARNINGS, WATCHES and ADVISORIES:

- http://www.wrh.noaa.gov/sto/brief/www_bc_cal.php

WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Eureka Weather:

High pressure will bring dry conditions and warm temperatures to much of northwest California through the weekend. Coastal clouds will return this weekend as a southerly surge of stratus moves up the northwest California coast.

San Francisco Weather:

Dry conditions and seasonal temperatures are expected to prevail through the weekend and into the first part of next week, aside from a slight chance of a thunderstorm this afternoon over the elevated terrain of the forecast area's far southeastern interior. However, beginning about midweek a series of Pacific weather systems will bring the possibility of precipitation to the forecast area.

CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY

Sacramento Weather:

Lingering Sierra showers and thunderstorms are possible through the weekend; otherwise, dry and warmer temperatures into early next week. Cooler and wetter weather arrives middle of next week into next weekend.

Hanford Weather:

Today the forecast area will see a slight warming of temperatures. There will be a chance of showers and thunderstorms over the southern Sierra Nevada this weekend and a slight chance of showers and thunderstorms over the southern Tehachapi Mountains today as a weather system moves through. A weak upper ridge will return with dry conditions and warmer temperatures early next week.

WEATHER

WEATHER SYNOPSIS BY REGION:

SOUTHERN CALIFORNIA:

Los Angeles Weather:

Upper level low pressure will bring cool weather through the weekend and night through morning low clouds and fog for many coastal and valley areas today. Isolated thunderstorms are possible over the mountains this afternoon. Temperatures will warm slightly above normal early next week as the upper low moves east and high pressure briefly returns. A trough of low pressure will bring another cool down late next week.

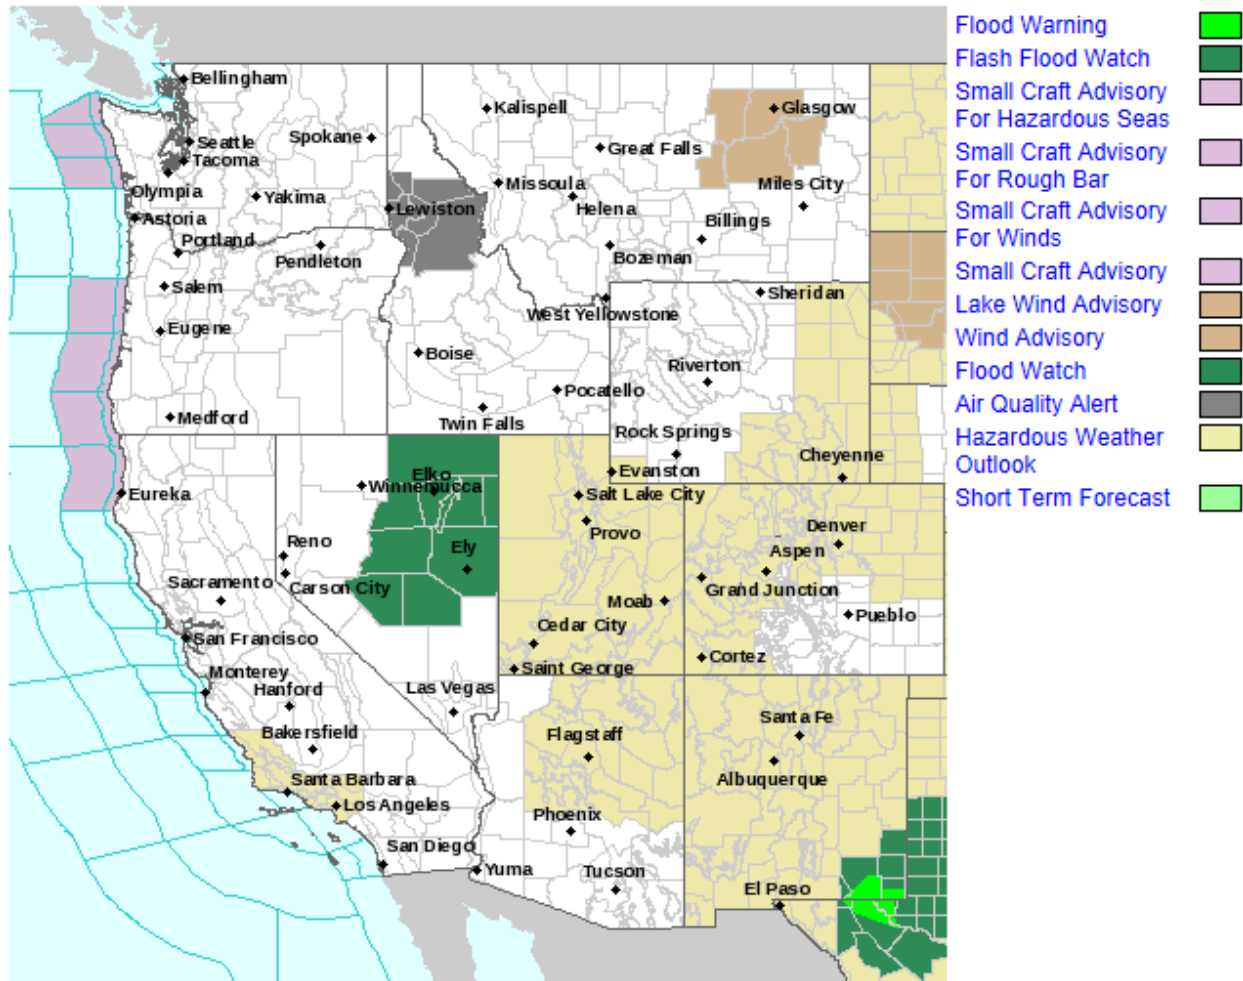

Extreme Southwestern California Including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

A slow moving area of low pressure will continue to bring cooler weather and a deep marine layer through Sunday. Patchy drizzle is possible this morning and there will be a slight chance for thunderstorms across the San Bernardino and Riverside County Mountains and the High Desert this afternoon. A warming trend and shallower marine layer is expected Monday through Wednesday as high pressure builds into the region.

Southeast California Weather:

Lingering moisture across the region and low pressure approaching from the west will keep at least slight chances for showers and thunderstorms for today. Drier air will gradually filter into the forecast area Sunday and Monday for a decline in storm chances. An approaching Pacific weather system late next week will lead to an increase in storm chances.
